

Service Letter

Service Letter No. 424
February, 1995

SUBJECT: Housing Serial Numbers

MODELS AFFECTED: 440, 440A, 450A, 450B

Starting on or about February 28, 1995, housing serial numbers will be located on the nameplate that is affixed to the outside of the housing. The serial number will no longer be stamped on the top side of the housing casting.

The serial number on the nameplate will be in alpha/numeric and barcode format. All serial numbers will begin with the letter K and will include the Engine Brake Model Number.

This is a Jacobs product improvement. It will allow the housing serial number to be viewed without removal of the engine valve cover.
